

Master of Science Graduate Research Assistantship Controlled Environment Plant Physiology Laboratory

The Walters Lab in The Department of Plant Sciences at the University of Tennessee, Knoxville is seeking qualified applicants for a graduate research assistant position. The successful applicant should be interested in hydroponic food production and be able to begin January 2021. Applicants unable to begin until May 2021 are still encouraged to apply. The selected student will receive a half-time research assistantship that includes a stipend, tuition, and health insurance.

Responsibilities: The graduate student will investigate questions related to leafy green and culinary herb physiology and production in controlled environments (greenhouses and growth chambers) using advanced environmental control, monitoring, phenotyping technology, and laboratory analysis.

Qualifications:

Highly motivated and enthusiastic candidates with a strong interest in controlled environment and hydroponic production, plant science, and food quality are invited to apply. A Bachelor of Science degree, preferably in Horticulture, other Plant Sciences, Biology, or a related field, is required. The candidate must possess excellent written and oral English skills, be self-motivated, highly organized, and willing to work with a diverse group of faculty, staff, and students to conduct greenhouse, growth chamber, and potentially laboratory research.

Contact: For additional information or to apply, please contact Dr. Kellie Walters (waltersk@utk.edu) and (if applying) attach the following:

1. Cover letter – include research experience and interests
2. Curriculum Vitae
3. Three references – include names, telephone numbers, and email addresses.

Application review will begin immediately and continue until the position is filled.

The University of Tennessee is a land grant university with an enrollment of over 27,800. The Plant Sciences Department is located on the Agricultural Campus with lab facilities, greenhouse and growth chamber space, and nearby field space to support active production research. The University of Tennessee also has ten research and education centers to facilitate statewide agricultural research.

Knoxville, Tennessee is a vibrant community, with a population of approximately 183,270. This community boasts a thriving music and arts scene, along with plenty of opportunities for outdoor adventures in the nearby Great Smoky Mountains National Park.
