INTERNSHIP

About our Club

North Ridge country Club is an exclusive private, member-owned country club located in Raleigh, North Carolina. We are a full-service club with two 18-hole golf courses, Golf Learning Center, and practice facilities. We also have several food and beverage options around the property including our quick service Sand Trap, Blue Bird Grill, Mulligan's Café, and Halfway Houses on our courses.

Located on nearly 400 acres of rolling, wooded terrain, the impressive complex and grounds of North Ridge Country Club offer exceptional social and recreational opportunities for our members, their families, and guests. The two 18-hole golf courses, aptly named Lakes and Oaks, were designed by Gene Hamm and George Cobb, and were later updated by John LaFoy and Kris Spence.

Internship Program Description

Our competitive internship program focuses on developing knowledge and experience pertinent to the advancement of your golf course management career. You will gain hands-on training in equipment operation and maintenance, course set-up, irrigation, chemical and fertilizer application, personnel management, record keeping, and project management under the direction of course Superintendents, Equipment Manager, and Director of Agronomy with a combined 60+ years of experience. Each student experience will be tailored specifically to match the expectations of your school's program and career goals and aspirations. At North Ridge, we believe in investing in the future by making a commitment to provide the most comprehensive and educational experience possible for each intern. At the end of the summer, interns who successfully complete the program will be awarded a scholarship on behalf of North Ridge Country Club's Agronomy Team.
